

OAKLEIGH MANOR

bonded gravel surfaces

COMMERCIAL SERVICES

A highly efficient service for commercial clients

ABOUT US

Bonded Gravel Surfaces is part of Oakleigh Manor Limited; an award winning landscape design & build company with decades of experience in domestic and commercial landscaping.

Bonded Gravel Surfaces was formed to meet the growing demand for bonded surfacing. Our aim is to provide top quality surfacing, with an added consideration for the landscape the surface sits in.

OUR SERVICES

DESIGN DEPT

Our award winning design department has decades of experience in landscape design. We can design every aspect of a new surface and it's surroundings.

We can use either existing plans, OS Land Plans or carry out our own technical survey to enable us to create the master plan of the area. This can include surrounding features as well as the new surface.

SPECIFYING

We will provide you all the documentation and support you require to specify a resin bonded or bound gravel surface. Including:

- Application specifications
- Substrate specifications
- Edging and drainage requirements
- Technical performance data
- Health and safety and COSHH sheets
- Bespoke product application testing

ESTIMATING

We can quantify and provide estimated costs from drawings or square meterage. This can be supplied for the resin surface, base preparation, substrate, edging and any other requirements of the project.

CONSTRUCTION TENDERS

Once an exact specification has been established by our design department or provided in a tender document, we will carry out a site assessment (if required) and provide a fixed cost quotation for the installation of the surface and any ancillary works. **We provide:**

- Scale drawings (if applicable)
- Construction specification
- Method statements
- Risk assessments
- 10 year Guarantee details
- Company policy and procedures guide
- References (on request)

CONSTRUCTION

Our highly skilled on site teams will bring every aspect of the project to fruition with ruthless efficiency. We aim to leave you with a finished product which is second to none.

OUR SURFACES

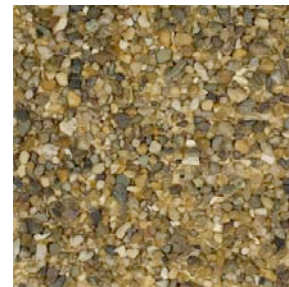

BOUND

Resin bound is a porous, SuDs compliant surface used to create seamless, functional areas for pedestrian and light vehicle use.

The open matrix of the finished surface reduces ponding and run off allowing water to drain naturally.

BONDED

Resin bonded gravel is a decorative, highly slip resistant surface for use in a wide range of applications.

The finished surface is available in a wide range of colours and gives the appearance of loose gravel, without the drawbacks.

Resin bound gravel surfaces

OVERVIEW

Resin bound surfacing is a resin bound aggregate surface for pedestrian and vehicle trafficked surfaces such as paths, walkways, pavements, patio areas, driveways, car park bays, small car parks.

Resin bound surfacing is functional, highly decorative, can be laid without joints and is slightly flexible. It offers an attractive alternative to concrete, tarmac and block paving finishes.

The open matrix structure allows water to drain through into the substrate, feed any surrounding trees and plants and avoid any change of or damage to the natural water table. This open matrix construction is in line with the requirements of Sustainable Drainage Systems (SuDS), designed to reduce the potential of flooding on new and existing urban developments.

Resin Bound Surfacing must be laid onto a sound stable and solid base such as concrete or tarmac.

USES

- Decorative natural aggregate surfacing
- Footpaths, walkways, corridors, cycle paths
- Playgrounds, pool and pond surrounds
- Driveways, car park bays
- Showrooms, offices, reception areas, art galleries
- Patios, conservatories, gardens, gazebos

BENEFITS

- Attractive natural aggregate appearance
- Highly porous allowing water to drain
- UV stable non yellowing resin
- Recycled aggregates available (SuDS)
- Anti-slip surface dressing increases safety
- No weeds and low maintenance
- 10 year guarantee

Resin bonded gravel surfaces

OVERVIEW

Resin Bonded Surfacing is a fast curing resin bonded aggregate surfacing system for providing hardwearing slip resistant decorative flooring for foot, vehicle and heavier traffic.

It creates the look of natural aggregate without the mess of loose gravel. Resin Bonded Surfacing can be applied to most substrates and dependent on the type of aggregates cast onto the surface provides superb hardwearing grip and traction for both foot and vehicular traffic, maximizing slip resistance and enhancing the appearance.

Resin bonded surfacing must be laid onto a sound stable and solid base such as concrete or tarmac.

RESIN BONDED SEAL COAT

A clear seal coat can be applied to the finished resin bonded surface. This seal will improve aggregate retention, increase abrasion resistance and makes the surface easier to clean.

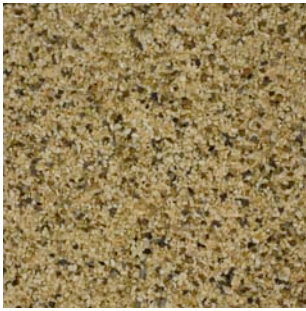

USES

- Suitable for public areas, industrial, commercial, retail and domestic use such as landscaping, factories, car parks, ramps, museums, steps, platforms, footbridges, driveways, patios, roads, cycle paths, indoor markets, platforms, roof gardens, and general public areas.
- Assists in meeting requirements of Disability Discrimination Act 1995
- Can be applied to bituminous, cementitious, metal and timber surfaces.

BENEFITS

- Fast curing for minimum disruption
- Self priming and tolerant to application on cold, damp surfaces
- Wide range of colour and size aggregates available
- Low maintenance can be further enhanced with Resin Bonded Surfacing Seal Coat
- Life expectancy of 10 years in most environments
- 10 year guarantee

RESIN BONDED COLOUR CHART

0.5-1.4mm Chinese Bauxite

1-3mm Rounded Sepia

1-3mm Red Granite

1-3mm Chinese Bauxite

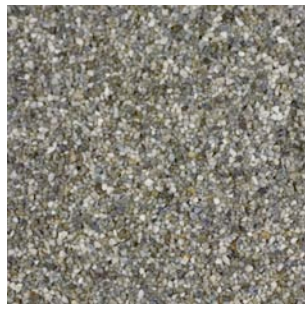

1-3mm Rounded Sepia (Unsealed)

**All samples are sealed
unless otherwise stated**

0.9-1.4mm Multi Flint

0.9-1.4mm Guyanan Bauxite

1-3mm Multi Flint

1-3mm Guyanan Bauxite
